

Your New Clean Power Provider

Sonoma Clean Power (SCP) is the new, not-for-profit electricity provider in Sonoma County, serving everyone in the participating cities of Windsor, Santa Rosa, Sebastopol, Cotati and Sonoma as well as all of the unincorporated areas of the County.

By partnering with PG&E to deliver SCP's power, you get the same reliability you're used to, but with more renewable energy from cleaner sources like solar and geothermal, at competitive prices. You'll get just one bill from PG&E with all of your power costs every month and you will still call PG&E to start and stop service, report outages/emergencies.

CleanStart

SCP's CleanStart service offers 1½ times the renewable energy offered by PG&E and costs 2% to 3% less (as of February 2014). It's better for your wallet, the planet and Sonoma County!

EverGreen

SCP's premium EverGreen service is 100% local renewable energy, producing zero greenhouse gas emissions.

See reverse for more information.

**Help power a clean
energy economy today!**

Local. Renewable. Ours.

Want to do more to address the climate crisis?

You don't have to wait! You can become a customer of Sonoma Clean Power (SCP) now, and begin receiving service in May 2014, when you commit to SCP's premium EverGreen service. You'll pay just 3.5¢ per kilowatt-hour more than for SCP's default service.

EverGreen

Your dollars pay for:

- 100% local, renewable geothermal energy from the Geysers
- Baseload power that facilitates the installation of more solar power
- The satisfaction of knowing that more of your dollars stay in Sonoma County to support our local economy
