

Smoke, Air, Fire, Energy (SAFE) Symposium

Rural & Tribal Community Resilience Strategies for Action

This day-long, in-person **SAFE Symposium** brings together Tribal leaders, students, researchers, government officials, agencies, and others working on related topics of **smoke, air, fire, energy**, with a goal of enhancing rural and Tribal communities' climate resilience.

Why now? Communities across the region face increasing fire risk, unreliable energy systems, and worsening air quality. At the same time, there is state and federal funding to address these risks and build skills for related jobs. The **SAFE Symposium** will include workshops, trainings, speakers, and discussion, sharing what works in our communities, identifying unmet infrastructure and workforce needs, building connections and learnings to refine priorities and projects for funding opportunities and overall resilience. **Please join us!**

When: **March 1st, 2023** (10 am start time)

Where: *Blue Lake Rancheria, Sapphire Palace*
428 Chartin Road, Blue Lake, CA 95525

RSVP: <https://hsu.link/safe>

SAFE Project

Smoke, **Air, Fire, Energy**
Sponsored by CA Strategic Growth Council

This symposium is sponsored by the SAFE Project with funding through the California Strategic Growth Council and by the U.S. Department of Energy Solar Energy Technologies Office.
