

# **MEETING MATERIALS**

NORTH COAST RESOURCE PARTNERSHIP (NCRP) LEADERSHIP COUNCIL (LC) & TECHNICAL PEER REVIEW COMMITTEE (TPRC) MEETING Date/Time: Friday, July 14, 2023; 9 am – 3:00 pm

# **BACKGROUND INFORMATION AND RECOMMENDATIONS**

The following items correspond to the NCRP Quarterly Meeting agenda for July 14, 2023 per agenda order and item number. The items below include background information for agenda items that require additional explanation and, in some cases, include recommendations for action. The meeting agenda and other meeting materials can be found on the NCRP website at https://northcoastresourcepartnership.org/north-coast-resource-partnership-quarterly-meetings/

#### VII NCRP NOMINATIONS, ELECTIONS, COMMITTEE ASSIGNMENTS

# A: Tribal Nomination and Election Process & Decisions, Sherri Norris, NCRP Director of Tribal **Engagement**

North Coast Tribes met on June 27, 2023 to discuss Tribal nominations and elections, per the process described in the NCRP Policies and Procedures Handbook. NCRP Director of Tribal Engagement Sherri Norris will provide an overview of the process, and decisions from the June 27 meeting.

# B: NCRP Executive Committee, Chairs, Vice Chairs, Karen Gaffney, NCRP Director of Strategic **Planning and Communication**

Per the NCRP Policies and Procedures Handbook, the NCRP Leadership Council will nominate and elect a Tribal and county Co-chair, a Tribal and county Co-vice chair, and a Tribal and county Executive Committee member at large. Current roles on the NCRP Executive Committee are as follows:

- Leaf Hillman, Karuk Tribe, Co-Chair
- James Gore, Sonoma County, Co-Chair
- Michelle Downey, Round Valley Tribal Council, Co-Vice Chair
- Steve Madrone, Humboldt County, Co-Vice Chair
- Nathan Rich, Kashia Band of Pomo Indians, Executive Committee Member
- Nancy Ogren, Siskiyou County, Executive Committee Member

# C: NCRP Ad Hoc Committees, Karen Gaffney, NCRP Director of Strategic Planning and Communication

The NCRP relies on Ad Hoc committees to provide input, guidance and decision making on key initiatives. Ad Hoc Committees are comprised of less than a quorum of Leadership Council members, and are disbanded once the committee is no longer needed to provide input, guidance and decision making. Current Ad Hoc Committees include:

- Regional Forest and Fire Capacity (RFFC) Ad Hoc Committee, focused on continued refinement and implementation of the <u>Vision for North Coast Resilience</u>
- Tribal Proposition 1 Disadvantaged Community and Tribal Involvement Ad Hoc Committee
- NCRP Proposition 1 Implementation Ad Hoc Committee

### STAFF RECOMMENDATION:

- Disband NCRP Proposition 1 Implementation Ad Hoc Committee
- Continue RFFC Ad Hoc Committee
- Consider forming new Ad Hoc Committees (eg, Capacity, Funding)

#### VIII **JIMMY SMITH AWARD**

Jimmy Smith was a member of the Humboldt County Board of Supervisors, a commercial fisherman, and the first Chairman of the North Coast Resource Partnership. After his passing, the North Coast Resource Partnership established the Jimmy Smith Award to honor those who reflect his qualities of leadership, his commitment to finding common ground, respecting local autonomy, and achieving beneficial outcomes for North Coast watersheds and communities.

Past recipients of the Jimmy Smith Award include former NCRP Chair Jake Mackenzie, current NCRP Co-Chair Leaf Hillman, and former NCRP Chair Judy Morris. Nominations and elections will take place during the meeting on July 14, 2023, and the award will be presented during the next NCRP quarterly meeting (scheduled for October 2023).

#### IX LEGISLATIVE UPDATE & STAFF TEAM TRANSITION,

Susan Haydon, NCRP Director of Legislation and Policy

# California Legislative and Budget Update (as of July 3)

The Legislature is heading into its month-long summer recess having negotiated with Governor Newsom to finalize the majority of the FY 2023-24 budget Totaling about \$310 billion. The new budget includes some cuts and spending deferrals to accommodate an expected deficit of approximately \$32 billion but does not dip into the state's rainy day fund or other reserves. The budget negotiations included a hotly contested package of bills to streamline permitting and contracting for infrastructure projects. At the same time, the Legislature has conducted dozens upon dozens of policy committee

hearings to vet hundreds of bills. When the Legislature returns from its summer recess on August 14, it will have just five weeks to conclude its business, which hopefully includes a water and climate resilience bond to be considered by the voters at the March Primary Election as well as important policy bills. More detail on the budget, bonds and policy bills is provided below.

California's budget has been nothing short of a roller coaster over the past several years, as the state budget experienced a projected \$54.5 billion pandemic induced deficit in 2020, followed by two years of record surplus in 2021 and 2022, only to be followed by deficit once again in 2023. Losses in the stock market led to lowered capital gains taxes and layoffs, particularly in the tech sector, reduced personal income tax revenue that both impacted the state's coffers. Further challenging the budget picture is tax filing deadline extension to October that was granted to virtually all of California due to the winter storms. At this point, the budget that was recently passed was done so without a realistic projection of revenues. Accordingly, the state budget covers the deficit without tapping into reserves, but, instead, relies on funding cuts, deferrals, and shifts. In the water and natural resources space, some drought funding was shifted to flood improvement programs while wildfire resilience programs were kept whole. Nature-based solutions funding at conservancies, Sustainable Groundwater Management Act funding, recycled water and several other categories have been cut from the budget and are proposed to be covered by a potential climate resilience bond.

California last passed a natural resources bond in 2018, Proposition 68, and last passed a water bond in 2014, Proposition 1. The Legislature has considered bond proposals over the past several years, but budget surpluses negated the need for a bond, not so anymore. Governor Newsom, in his January press conference releasing the budget proposal stated his openness to a climate resilience bond. The Legislature has taken that cue and introduced several bond proposals, including:

- SB 867 (Allen) \$15.5 billion climate resilience and water resources bond
- SB 638 (Eggman) \$6 billion flood bond
- AB 1567 (Garcia) \$15.9 billion climate resilience and water resources bond
- AB 305 (Villapudua) \$4.5 billion flood bond
- AB 408 (Wilson) \$3.365 billion sustainable agriculture bond

These bond proposals are currently in the policy committee hearing process and must complete several steps to get across the finish line, none more important than a negotiation between the Senate, Assembly and Governor to refine a final proposal. Impacting this negotiation are bond proposals for mental health, the Governor's top priority, schools, and housing. Stakeholders will advocate for a bond to be completed by the time session ends on September 14, but if that does not come to pass then the effort will continue in 2024 to put a bond on the November ballot.

There are an unprecedented high number of policy bills that were introduced into the 2023 legislative session, and several that are relevant for the North Coast are included in the Updates section, below.

#### X SLATE OF STAFF RECOMMENDATIONS REGARDING NCRP FUNDING DECISIONS

The NCRP has pursued funding approved by the Leadership Council from an array of agencies and philanthropic organizations related to wildfire resilience, biomass, climate adaptation and mitigation, water and wastewater infrastructure enhancement, capacity and technical assistance. The NCRP staff and consultant team is in the process of performing assessments, identifying projects and providing technical assistance to project sponsors, with the intent of disseminating funding and resources to project partners for implementation. Several of these projects and initiatives will require time sensitive decisions related to the establishment of project selection criteria, prioritization of projects and funding awards, and these decisions will need to take place prior to the next scheduled Leadership Council meeting in October 2023.

## STAFF RECOMMENDATION:

For the following projects, the NCRP staff and consultant team will develop draft criteria for project prioritization and selection processes, with input from the NCRP Technical Peer Review Committee. The NCRP RFFC Ad Hoc Committee will review and approve final project prioritization and selection processes and make decisions on funding awards if these decisions need to be finalized prior to a full Leadership Council meeting. All decisions will be shared with the full Leadership Council at the next full Leadership Council meeting.

# **CAL FIRE Pilot**

\$10 million block grant to connect the RFFC funded NCRP Vision for North Coast Resilience plan with implementation projects that achieve the goals of the CAL FIRE Forest Health Program. The objective of the CAL FIRE Forest Health Program is to conserve forests and improve forest health by significantly increasing fuels reduction, fire reintroduction, treatment of degraded areas and conservation of threatened forests with landscape-scale projects developed and led by regionally-based efforts.

# **OPR Regional Biomass Strategy/Woody Feedstock Initiative**

\$700,000 to develop a regional biomass strategy, regional assessments of fuel loading, environmentally sensitive vegetation management, and biomass utilization opportunities including facilities siting, governance structures and financing mechanisms. Issuance of subregional grants to project sponsors in the region to develop actionable plans for evaluation of governance structures, financing and legal issues affecting biomass utilization at the local scale. Sub-grants to be led by regional partners including Tribes, NGO, counties, RCDs, private sector firms and others.

# **Humboldt Area Foundation and Wild Rivers Foundation**

\$400,000 to perform a quantitative assessment of capacity in Tribal and rural fire departments and fire response organizations in Humboldt (including Karuk Tribal territory that overlaps with Siskiyou County), Del Norte, and Trinity Counties.

- Document, prioritize and provide capacity investments most needed in each community, fire department or protection district to ensure long term, sustainable forest health, fire preparedness, fire prevention and fire response capacity - including (but not limited to) financing mechanisms; certifications, recruitment, training, and retention; accounting, administrative or project management systems; funding development skills; operational structures; regional sharing of resources, etc.
- Consider this a phase one to evaluate and fine tune future, expanded capacity investment strategy for the entire North Coast region, with funding from RFFC and other sources

#### ΧI DRAFT NCRP DASHBOARD

The NCRP Leadership Council requested that NCRP staff develop a dashboard of accomplishments that outlines the work and impacts of the NCRP. A draft dashboard for review and discussion is included in Appendix A. Once input from the Leadership Council is received, NCRP staff propose to refine the structure and content, and update this dashboard at least yearly or when major milestones are achieved, and to provide a simplified version of some of these dashboard elements during every quarterly meeting. When the NCRP updates its website, a digital dashboard of accomplishments will be part of this website enhancement, to be viewed and used by the Leadership Council, Technical Peer Review Committee, staff, consultants and partners.

#### XII 2023-24 QUARTERLY MEETING DATES & LOCATIONS (IN PERSON)

During the COVID pandemic, an emergency declaration allowed for Leadership Council meetings to be held via zoom or other platforms. This emergency declaration has been lifted, and the Brown Act requires that NCRP hold in person meetings. The NCRP has historically held in person meetings throughout the region, typically in or near Eureka, Yreka, Weaverville and Ukiah, with occasional meetings in Sonoma County.

# STAFF RECOMMENDATION:

Hold NCRP quarterly meetings on the following dates and at the following locations:

- October 20, 2023 (Eureka area)
- January 19, 2024 (Ukiah area)
- April 19, 2024 (Weaverville area)
- July 19, 2024 (Yreka area)
- October 18, 2024 (Eureka area)

#### XIII **UPDATES**

# A. REGIONAL ADMINISTRATOR & PROJECT IMPLEMENTATION UPDATE

Overview: The County of Humboldt acts as the regional applicant and Regional Manager of grant funds on behalf of the NCRP. The Humboldt Regional Administrator Team (Admin Team) continues to collaborate with funders, NCRP consultants, and local project sponsors (LPS) to ensure quality grant deliverables and timely reimbursement payments. Members of the Admin Team are available to discuss suggestions or concerns regarding their work on behalf of the NCRP; see contact list below.

# **ACTIVE IMPLEMENTATION GRANTS**

				Time	eline
Grant Name	<b>Grant Award</b>	<b>Grant Award</b>	Funding	Grant	
	Amount	Spent/Invoiced	Agency	Agreement	Completion
Prop 1 Round 1	\$12,720,000	\$5,912,851	DWR	April 2020	June 2025
Urban/Multi-benefit Drought Relief: Impl.	\$7,907,271	\$2,472,338	DWR	March 2022	April 2026
Urban/Multi-benefit Drought Relief: Planning	\$685,485	\$342,743	DWR	June 2022	Aug 2025
Prop 1 Round 2	\$9,280,000	\$0.00	DWR	Pending	Pending
			CAL		March
Regional Forest Health Pilot	\$10,000,000	\$0.00	FIRE	Pending	2028

Proposition 1 Round 1: A total of seventeen LPS, out of the twenty that received funding under this grant round, have completed the CEQA review for their projects and have obtained clearance to commence construction activities, and fifteen LPS have started the construction activities. One construction project is complete with the retention released and five LPS have completed the project construction implementation and are working on the Project Completion Reports in order to close out the grant. The rising cost of fuel and materials are straining the budgets of a few projects, which has created a need to re-bid and a few projects have secured additional funding to cover the increased costs, resulting in slight delays. However, there is still ample time to complete the projects before the term of the agreement ends. Approximately \$1,000,000 of the advance payment funds have been spent to date. Four LPS have spent all of the advance payment of grant funds, with only two LPS continuing to provide accountability reports to document spending and project progress on advance payment funds. The Admin Team continues to provide grant agreement administration support and coordinate with the LPS and the Department of Water Resources (DWR) to secure approval for construction activities, invoice payments, and advance payment accountability reporting.

**Proposition 1 Round 2:** On May 18, 2023, DWR announced the \$9.2 million award to the NCRP region for the final round of Proposition 1 grant funds for thirteen implementation projects. The award letter was received and accepted by the County of Humboldt and DWR is currently drafting the grant agreement. The Admin Team is gearing up to obtain all required documents to execute the grant agreement and corresponding sub-grant agreements and provide orientations to the LPS.

**Urban & Multibenefit Drought Relief Grants:** The LPS in the UMDR grants have hit the ground running. Seven out of the fifteen LPS that received implementation funding have completed CEQA and designs for their projects and have been cleared to commence construction activities. Two LPS have completed the construction implementation and are completing the Project Completion Report to close the grant out this summer. Unfortunately, one Project had to decline the grant award, due to insufficient staffing levels. DWR has authorized the reallocation of those unused funds to support other projects in the suite that are having budget issues, as needed; all associated NCRP policies and procedures will be observed. With the increased inflation costs that have been incurred since the original applications were drafted, multiple LPS have already determined they may need additional funds. The Admin Team will continue to work with these LPS to ensure the grant funds are utilized and project goals are achieved. To date, approximately \$2,800,000 of the grant funds have been expended. This includes an advance payment of fifty percent of the associated seven project budgets, collectively totaling \$1,741,380. The Admin Team continues to provide grant agreement administration support and coordinate with the LPS and DWR to secure approval for construction activities, invoice payments, and advance payment accountability reporting.

Regional Forest Health Pilot: CAL FIRE awarded the NCRP a \$10 million grant to implement the Regional Forest Health Pilot. This program was developed in collaboration with the California Wildfire and Forest Resilience Task Force (Task Force) and designed to be one of the implementing engines, furthering the goals of the California Department of Conservation's (DOC) Regional Forest and Fire Capacity (RFFC) Program (see more about the associated RFFC planning grant below). Draft program guidelines state that, "The Task Force recognizes that central to achieving the goals of the California Wildfire and Forest Resilience Action Plan is the need to mobilize regional approaches to improve the health and resilience of forested landscapes" and "Regional Grant Pilots have the potential to bring funding to high-priority projects that would not otherwise access Forest Health or similar grant funding. They may also foster regional capacity building and prioritization partnerships by providing resources to carry out the regional priority projects". The NCRP Regional Forest Health Pilot will be a test bed intended to result in a regional, landscape scale portfolio of projects that implement the goals of the CAL FIRE Forest Health Program. It will be used to evaluate opportunities to connect CAL FIRE's Forest Health program with the priorities outlined in the NCRP's Regional Priority Plan funded by DOC's RFFC Program. The Admin Team is working closely with core NCRP, CAL FIRE, and Task Force staff to develop a detailed scope of work and grant agreement for these funds.

# **ACTIVE PLANNING GRANTS**

			Timeline		
Grant Name	<b>Grant Award</b>	Funding	Grant		
	Amount	Agency	Agreement	Completion	
Tribal Engagement & Economic Opportunity for Disadvantaged					
Communities (DACTI)	\$2,650,000	DWR	April 2017	Oct 2023	

			Time	eline
Grant Name	<b>Grant Award</b>	Funding	Grant	
	Amount	Agency	Agreement	Completion
Regional Forest and Fire Capacity - Round 1	\$4,037,500	Natural Resources Agency/Department of Conservation	May 2019	March 2024
Regional Forest and Fire Capacity - Round 2	\$13,560,000	Department of Conservation	November 2021	December 2025
Fire Response Capacity Project	\$400,000	Humboldt Area Foundation & Wild Rivers Community Foundation	November 2021	Nov 2023
Woody Feedstock Aggregation Pilot Project	\$700,000	Governor's Office of Planning and Research	February 2022	March 2025
Actionable Lidar-Based Data for Wildfire Prevention Planning, Response, and Rehabilitation on California's North Coast	\$123,656	National Aeronautics and Space Administration	Oct 2022	Oct 2024
Riparian Corridor Regional Work Plan	\$45,000	Resources Legacy Fund	August 2022	Dec 2023

Tribal Engagement & Economic Opportunity for Disadvantaged Communities or "DACTI": The Humboldt Admin Team continues to work toward the goals of this project in close coordination with core NCRP consultant staff, West Coast Watershed (WCW) and the California Indian Environmental Alliance (CIEA). Technical assistance continues to be provided to disadvantaged communities (DACs) and Tribes to help them identify needs and potential solutions and prepare to take advantage of the next round of support and funding opportunities. An amendment was executed for a six-month extension (through October 2023) to allow more time for successful completion of all deliverables and spend down of remaining funds. Despite the extension, staff continue to prepare for project closeout; a spenddown plan and final reconciliation are underway.

Regional Forest and Fire Capacity (RFFC) Program Block Grants: The Humboldt Admin Team continues to work toward the goals of the RFFC Program in close coordination with WCW and CIEA, with County staff providing grant agreement administration and project management support. The California Department of Conservation (DOC) and the Natural Resources Agency (NRA) continue to provide program guidance to staff as the RFFC Program unfolds.

The NCRP core staff team worked closely with DOC staff to amend the scope and budget of the RFFC Round 2 Agreement to increase the budget by \$10,600,000 from \$2,960,000 to \$13,560,000 and extend the original grant term (11/01/2021 through 3/31/2025) to 11/01/2021 through 12/31/2027. The amended scope of work is designed to align with and reflect all elements of the 2022 RFFC

program guidelines, and will support the rapid increase of wildfire, forest, and community resiliency projects consistent with the California Wildfire and Forest Resilience Action Plan, Agreement for Shared Stewardship of California's Forests and Rangelands, the California Forest Carbon Plan, and Executive Order B-52-18. This will be accomplished through refining and implementing NCRP's Regional Priority Plan, supporting the enhanced capacity of regional partners, and developing a substantial suite of priority projects ready for implementation. The refreshed scope builds on and complements previous RFFC grant awards to the NCRP.

The Round 1 RFFC grant Agreement was extended to March 2024 to allow more time for work plan implementation, primarily work related to Tribal engagement and coordination. A corresponding professional services agreement term extension amendment was executed with CIEA; NCRP's tribal engagement team.

Fire Response Capacity Project: The Admin Team continues to administer a grant, on behalf of the NCRP, from the Humboldt Area Foundation and Wild Rivers Community Foundation to support a pilot project intended to strengthen the long-term sustainability of the fire response programs of Tribes and very rural fire departments and protection districts, through capacity building. The geographic area covered by this pilot project encompasses Humboldt (including Karuk Tribal territory that overlaps with Siskiyou County), Del Norte, and Trinity Counties. This pilot project is being integrated into the larger regionwide RFFC Program.

Woody Feedstock Aggregation Pilot Project: The County of Humboldt, on behalf of the NCRP, was selected as one of five public agencies to lead pilot projects to develop and provide regional strategies to improve feedstock supply chain logistics in order to produce community fire resilience benefits. Work is ongoing and a grant agreement amendment was recently negotiated and executed. The amendment increased the grant by \$200,000 (for a total of \$700,000) and added additional expert consultant resources to the project team.

Riparian Corridor Regional Work Plan: This funding, provided by the Resources Legacy Fund, is supporting the development of a detailed scope of work to share with funders for the creation of an aquatic ecosystem and working lands conservation plan for the North Coast Region. A grant agreement has been executed and project work is ongoing.

Actionable Lidar-Based Data for Wildfire Prevention Planning, Response, and Rehabilitation on California's North Coast: The NCRP worked with regional and state partners to secure funding for the "Filling the gaps in lidar data for Northern California" project which is supporting the acquisition and processing of lidar data by the U.S. Geological Survey (USGS). Subsequently, the NCRP was selected to receive funds (\$149,466) from the National Aeronautics and Space Administration (NASA) to support the "Actionable Lidar-Based Data for Wildfire Prevention Planning, Response, and Rehabilitation on California's North Coast Project". The Project will process the lidar data collected by the USGS to create a unified point cloud and derived products to support wildfire planning, response, and recovery for the

twelve (12) million acres of California's North Coast Region. The Admin Team executed a grant agreement with NASA as well as the associated professional services agreement with the implementing consultant team and established the administrative processes to successfully manage the grant.

ADMIN TEAM CONTACTS						
Name	Contact Information	NCRP Admin Role				
Hank Seemann, Deputy Director	hseemann@co.humboldt.ca.us	Program Oversight				
Cybelle Immitt, Natural Resources Planning Manager	cimmitt@co.humboldt.ca.us	Regional Administration Team Management and Program Oversight				
Denise Monday, Senior Environmental Analyst	dmonday@co.humboldt.ca.us	Lead Admin for IRWM Prop. 1 and Urban & Multi-benefit Drought Relief				
Julia Cavalli, Senior Environmental Analyst	jcavalli1@co.humboldt.ca.us	Lead Admin for DACTI and RFFC planning grants and associated demo projects (including leveraged multi-benefit grant agreements)				
Lauren Rowan, Environmental Analyst	lrowan@co.humboldt.ca.us	Lead Admin for Prop. 84 Final Round and admin support for Prop 1 and NCRP planning grants				

# **B. PROJECT DEVELOPMENT AND TECHNICAL ASSISTANCE**

The NCRP accepts Proposals for Technical Assistance to Tribes and economically disadvantaged communities to support project development and grant applications for the following programs:

- NCRP Regional Forest & Fire Capacity (RFFC) program
- Other funding programs for projects that improve forest health, increase wildfire resilience, and help communities and ecosystems address and adapt to climate change

Selected applicants will receive technical assistance directly from NCRP-approved technical assistance providers and may include organizational capacity building, strategic planning, grant development, preliminary project design/planning, site assessments, mapping and GIS analysis, permitting, project benefits quantification, and cost estimates. All proposals, including supporting documents, are submitted via the NCRP Project Tracker.

Proposals are accepted on a rolling basis via the NCRP Project Tracker and are reviewed quarterly: February 1, May 1, August 1, November 1.

The NCRP has provided TA to a total of 84 projects to date. Following are the Technical Assistance projects submitted in 2023.

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
Briceland Volunteer Fire Department, Briceland VFD Wildfire Resilience Project	Humboldt	Work in progress	Briceland Volunteer Fire Department (Briceland VFD) is seeking technical assistance, including help attaining necessary environmental permits, mapping, and grant preparation, to develop a wildfire resilience/fuels reduction project on Old Briceland Ridge. The project will increase wildfire protection of Briceland Road, the primary access route for the many communities west of Highway 101, by developing a comprehensive fuels treatment along a strategically-located ridge separating this corridor from large timberland tracts to the south. Work will include 6 miles of ridgetop shaded fuelbreak, 250 acres of adjacent prescribed burning, and 36 acres of fuels treatment along Old Briceland Road.
ORE-CAL RCDC, Collier Interpretive and Information Center Educational Display Repair and Outdoor Signage Project	Siskiyou	Contracting in progress	CIIC is requesting technical assistance for two distinct but interrelated projects. The first is technical assistance to repair an indoor topographic display of the county integrated with video and information for education and to raise awareness of tourism and recreation opportunities and drought, Climate Change and how inter-regional cooperation can help to conserve our resources and way of life in Siskiyou County. The second technical assistance request is to develop a world class educational nature walk along the banks within the rest area for visitor education and enjoyment. Layout, planning, sign design and content expertise are needed to make this project happen.
ORE-CAL RCDC, COS Forestry and AG Program - TA for Development	Siskiyou	Work in progress	Ore-Cal RC&D Council is requesting Technical Assistance to apply for CalFire's Wood Products and Bioenergy Business and Workforce Development Grant for 2022-23. Ore-Cal requests Kim Carr Consulting services to write this grant. Kim wrote grant to fund such a program for Lake Tahoe Community College, Kim is familiar and respected by the funding agency with success in past applications. The program at Lake Tahoe CC is seeing overflowing classes, recognized as a workforce development program producing employable workforce to industry certification standards.

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
Hoopa Fire Safe Council, Hoopa Fire Safe Council - TA for Strategic Planning	Central Tribal Region Humboldt	Work in progress	In partnership with the Hoopa Wildland Fire Department, this spring a group of Hoopa residents re-vitalized the Hoopa Fire Safe Council, which had been incorporated as a Tribal non-profit several years ago, but hadn't continued to organize. The group identified two primary goals: to encourage residents to create defensible space around their homes; and to encourage residents to work with the fire department to safely conduct small cultural burns on their property. The group needs a strategic plan to guide activities going forward.
UCCE Humboldt, Humboldt County Prescribed Burn Association Southern Humboldt Technical Support	Humboldt	Work in progress	University of California Cooperative Extension (UCCE) is requesting technical assistance to support the further development of the Humboldt County Prescribed Burn Association in the greater Southern Humboldt area. The HCPBA is a community-based prescribed fire organization that assists landowners in planning and implementing prescribed fire projects. The requested technical assistance would allow the HCPBA to increase the number of planned and completed projects, expand the capacity of the organization, improve the ecological advisory process, and develop a cultural burn advisory program.
Jacoby Creek Land Trust, Jacoby Creek Riparian and Wetland Restoration Project - Phase 1 Planning and Acquisition	Humboldt	Work in progress	The Jacoby Creek Riparian and Wetland Restoration Project will enhance native salmonid habitat and water quality in the lower Jacoby Creek watershed through acquisition and restoration of four acres along the creek. This project is supported by the Jacoby Creek Water Sustainability and Anadromous Fish Habitat Enhancement Feasibility Study, a planning project that will develop to a 15% design level three community-supported multi-benefit project concepts that enhance aquatic habitat quality and reduce flooding impacts in the lower Jacoby Creek watershed. Technical assistance will support riparian property acquisition that is expected to be funded by the State Coastal Conservancy.
Leggett Valley VFD, Leggett Valley FD Technical Assistance for Hazardous Fuel Reduction Projects	Mendocino	Completed	Leggett Valley Fire Department would like to request technical assistance in developing projects to remove hazardous fuels from along the many narrow, winding, private ingress and egress roads, many that are "one way in one way out". This project would remove hazardous fuels along approximately 30 miles of private driveways in the Leggett Valley Fire Protection District.

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
Fruitland Ridge VFPD, Mail Ridge Project, Environmental Compliance TA	Humboldt Mendocino	Application approved	The project will advance planning of a multi-phased fuel reduction project identified as a priority project in the Humboldt County CWPP and other fuel reduction treatments along and adjacent to the crest of Mail Ridge, a prominent geographic feature in southern Humboldt and northern Mendocino Counties. The purpose of the project is to increase fire resiliency, protect nearby communities from fire risk, and make significant progress toward restoration of the traditional role of low intensity fire on the landscape.
Humboldt County RCD, Mail Ridge Project, Forestry TA	Humboldt Mendocino	Work in progress	The project will advance planning of a multi-phased fuel reduction project identified as a priority project in the Humboldt County CWPP and other fuel reduction treatments along and adjacent to the crest of Mail Ridge, a prominent geographic feature in southern Humboldt and northern Mendocino Counties. The purpose of the project is to increase fire resiliency, protect nearby communities from fire risk, and make significant progress toward restoration of the traditional role of low intensity fire on the landscape.
Trees Foundation, Mail Ridge Project, Prescribed Fire TA	Humboldt Mendocino	Work in progress	This project will advance project planning of a ridge line fuel break and associated forest health treatments along Mail Ridge in southern Humboldt County. Conceptualized by the Southern Humboldt Fire Safe Council, the project at the heart of this request for technical assistance will improve forest health, mitigate wildfire risk, ensure that the forests of southern Humboldt County continue to sequester carbon into the future, protect communities, and help the state meet its emissions reduction and climate change adaptation goals. This technical assistance request will help position the project for a future CAL FIRE Forest Health Grant Program application.
Native Health in Native Hands, N-Shong Konk' (Good Fire)	Mendocino	Application approved	Native Health in Native Hands' proposed project N-Shong Konk' (Good Fire) will provide direct benefits to all communities, including tribal members from multiple area tribes. We will organize, support, and provide training opportunities and equipment for tribal members to be engaged in prescribed fire practices and include cultural elements. Including cultural elements is supportive of cultural revitalization efforts and also brings important elements of ecological restoration. Our goal is fire safe communities that also have increased access to, and knowledge of, traditional foods that benefit from cultural fire.

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
Trinity Center VFD, North Trinity Lake Wildfire Response Plan	Trinity	Work in progress	The Trinity Center Volunteer Fire Department wishes to promote coordination of the many projects which are being proposed by various entities to reduce fuel loads and protect communities in the north Trinity Lake area. The end product would be an overall plan which identifies gaps, needs, and potential funding sources. In addition, the Volunteer Fire Department wishes to develop a response plan to future wildfires, which incorporates lessons learned and vulnerabilities identified during the 2021 River Complex.
ORE-CAL RCDC, Ore-Cal NEPA-CEQA Team - TA for development	Siskiyou	Application approved	This project seeks to develop a stand-alone interdisciplinary planning team to help economically disadvantaged communities and Tribes located in rural settings with project development and project planning, with an emphasis on providing NEPA/CEQA services, which is a major barrier for many entities seeking to plan and implement forest health projects.
Sherwood Firewise, Sherwood Firewise: Creating Defensible Space on Vacant Parcels - TA for GIS/Mapping	Mendocino	Completed	The Brooktrails subdivision is considered by fire agencies to be one of the highest risk areas in the state. In addition to being a "one way in and out" community, the subdivision has 1500 homes completely interspersed into the 4500 vacant lots and 2500 acres of forested greenbelt. Due to a building moratorium most of the vacant lots cannot be developed, so many property owners are unresponsive to legal notices requiring them to abate vegetation on the property. TA is requested to create GIS maps with parcel data layers, including property owner data, creating defensible space maps for needed treatment, and conducting outreach to property owners requesting voluntary compliance.
Shasta Valley RCD, Slater Fire Rehabilitation Project	Siskiyou	Work in progress	The Shasta Valley Resource Conservation District is seeking technical assistance for CEQA support for a project partnering sigh the Karuk Tribe to rehabilitate tribal lands burned in the 2020 Slater Fire. This technical assistance will provide support where in-house capabilities lacks for both the Karuk Tribe and the Shasta Valley RCD. The project will remove standing dead trees, making the removed wood available for tribal community fire wood use. Additionally, smaller fuels will be cut and piled, and resprouted hardwoods will be pruned to reduce stems. The units will be understory burned by the Karuk tribe.

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
SoHum Community Park, Southern	Humboldt	Contracting	A consortium of supporters of Southern Humboldt Community Park (also
Humboldt Community Park (Garberville)		in progress	known to locals as SoHum Park) comprise present Park uses /users and
<u>Infrastructure and Activity Upgrade - TA for</u>			management, native (Wailaki) goals (reviving native practices and uses)
Planning			and Institute for Sustainable Forestry goals (improving habitat and
			vegetation/trees through resiliency practices). There are four main
			components to the proposed activities, all aimed at improving the
			resilience of the Park in the face of climate change, fire safety, and
			bringing back native species valuable to the native tribes that to this day
			depend on their abundance to support their food and industrial activities.
Southern Humboldt Fire Chief's Association,	Humboldt	Work in	The Southern Humboldt Fire Chiefs' Association is requesting technical
SHFCA - TA to Develop Administrative		progress	assistance to develop an Administrative Support Position to assist the 17
Support Position			volunteer fire and emergency response member organizations. With this
			assistance, an analysis and a regional strategy will be used to create the
			scope of work and budget for the position. By developing this staff
			position, the SHFCA will increase the member departments administrative
			efficiency. It will also increase interagency cooperation in emergency
			response, training, and the capacity to assist with fuel reduction, forest
			health, and fire resiliency efforts. This will result in an increase in health
			and safety in the Southern Humboldt region.
Northern Mendocino Ecosystem Recovery	Mendocino	Work in	The Northern Mendocino Ecosystem Recovery Alliance (NM-ERA) mission
Alliance, Tan Oak Park Forest Health		progress	is to foster forest health in our region and to build a local workforce to do
Workforce Training Center - TA for			the necessary work. To that end, we plan to build a training center for
<u>Development Plan</u>			forest health and resilience jobs, working with the NPO Families and
			Friends United by AIDS, which owns Tan Oak Park, a non profit retreat
			center on Hwy 101 with facilities, water, appropriate zoning and
			everything but a training hall and a development plan. We are seeking
			technical assistance to develop a plot plan, infrastructure needs
			assessment, permitting help, project benefits quantification, forest
			management plan, and a design/cost estimate for a classroom structure.
Westhaven Community Services District,	Humboldt	Work in	The Two Creeks Watershed Conceptual Area Protection Plan draft is in
Two Creeks Watershed Protection-		progress	progress. This plan is funded by a current NCRP Technical Assistance
Conservation Lands			Grant. This planning effort has flagged high priority vacant lands along the
			riparian corridor and adjacent to CSD lands for public fee title acquisition.
			The Two Creeks Watershed Protection Plan seeks to maintain and
			enhance forest health, wildlife habitat and water quality in this coastal

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
			watershed. There are three (2) high priority parcels that are currently available (and time is of the essence). The Westhaven CSD requests technical assistance funding for (2) property appraisals to DGS Standards that will be used to support property acquisition.
Albion-Little River Fire Protection District, Water storage tanks for firefighting use in Albion and Little River - TA for plan development	Mendocino	Contracting in progress	This project seeks technical assistance for developing a plan and grant development for funding to install 10-12 water storage tanks in the Albion Little River Fire Protection District to provide water for firefighting use and also to maintain the insurability of properties within the district. Many property owners in the area have had their insurance dropped because of vulnerability to destruction by fire, due in part to the lack of availability of water for fire response.
Kneeland Fire Protection District, Kneeland Fire Protection District Annexation of Goodwill Response Area - TA	Humboldt	Work in progress	The purpose of the project is to help create a sustainable funding source for KFPD's Firewise activities and wildfire response in a 60,000-acre Goodwill Response Area (GRA). The Humboldt County Fire Chiefs' Assoc. has historically committed funding to support our out-of-district services. These funds, representing 40% of our annual revenues, will sunset in July, 2023. To fill the gap, KFPD has been working to annex the GRA but needs additional funds to get across the finish line. We are seeking technical support funds to allow us to continue working with Planwest Partners to: a) develop and submit an application to LAFCo to annex the GRA, and b) draft a ballot initiative that would establish a Special Service Zone for the annexed area with a unique Special Tax to support our response and Firewise activities in the annexation area. The project will support greater fire resiliency associated with increased Firewise activities and fire response across a 60,000-acre, high fire-risk area.
Timber Cove Fire Protection District, Site Planning for TCFPD for a Specialized Septic and Water System Upgrade	Sonoma	Application approved	In an effort to provide multiagency emergency services to all communities within the entire district & surrounding areas, TCFPD has set a goal to provide full-time paid, career firefighters at our existing fire station. In order to achieve this goal, our water & septic systems are in need of upgrades. At present the water system is a limited rain water catchment system. Due to soil percolation issues, the septic system needs special planning and engineering in order to provide the increased services we would like to provide. TCFPD is seeking technical assistance in the planning and design of both systems. This would include site assessment & engineered designs for both. systems.

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
Tolowa Dee-ni' Nation, Tribal Community Wildfire Protection Plan Facilitation	Northern Tribal Region Del Norte	Contracting in progress	The Nation has recently been approved to receive funding from the United States Department of Agriculture- Community Wildfire Defense Program in the amount of \$250,000.00, for the development of a Tribal Community Wildfire Prevention Plan (TCWPP). The Nation is seeking technical assistance to facilitate the development of the TCWPP including:  1. Develop an Outreach Plan to identify and convene key leadership, community members, interested parties, decision makers, and initiate collaboration with federal, state, tribal and local agencies, 2. Develop TCWPP goals and objectives, 3. Develop an Outline for the TCWPP, and 4. Develop a scope of work to inform the request for proposal for the development of the TCWPP. While the Nation is building expert capacity to address these needs in the future, we do not currently have available staff with the intimate knowledge of this particular plan development, contract and project needs.
Mattole Restoration Council, Prosper Ridge Community Wildfire Resilience Project	Humboldt	Work in progress	The Prosper Ridge Community Wildfire Resilience Project will provide strategic fuels treatments on private lands bordering the King Range National Conservation Area, a 68,000 acre Conservation Area managed by the Bureau of Land Management. The project will increase wildfire safety in the neighborhood and improve vital wildlife habitat by restoring Coastal Prairies and improving forest habitat. Project components include: 150 acres of mechanical thinning of undesirable understory shrub and small diameter timber with a diameter breast height (DBH) less than 16"; 150 acres of hand thinning of undesirable understory shrub and small diameter timber with a DBH less than 16" where slope and access make the use of heavy machinery impossible; 50 acres fuels reduction in Coastal Prairie habitat via mechanical removal of Douglas fir and coyote brush which has encroached into Coastal Prairie habitat due to fire suppression; 100 acres of prescribed fire
Shasta Valley RCD, Siskiyou PBA Structure Development TA May 2023	Siskiyou	Work in progress	The SPBA was started in 2020 with funding support from NCRP for the SVRCD's "Siskiyou County Collaborative Prescribed Burn Association and Demonstration Project." The Demonstration Project kickstarted the SPBA for the initial development of a PBA through leadership, training, and two demonstration burns. The SPBA has continued to develop, hosting and participating in burns and trainings throughout Siskiyou County and integrating with PBA efforts throughout the State. SVRCD has maintained

PROJECT SPONSOR, PROJECT NAME	COUNTY	STATUS	PROJECT DESCRIPTION
			a central coordination role for the SPBA despite limited sustained funds to do so. The SPBA wants to revise the guiding documents to reflect SPBA developments and to provide a framework to continue expanding the scope and impact of the SPBA.
Coast Ridge Forest Council, Coast Ridge Forest Council Pathway to Fire Resilient Landscapes on the Sonoma Coast	Sonoma	Work in progress	In response to the 2017 fires, an early coalition of stakeholders formed the Sonoma Coast Collaborative to confront the threat of wildfire at a landscape level. While some problems and solutions were addressed individually and in the short term, most require long-term, strategic, and cross-sector coordination. By centralizing this work under the leadership of the Coast Ridge Forest Council, we aim to develop a comprehensive plan to reduce wildfire risk to people, communities, and natural and cultural resources while sustaining and restoring healthy, resilient fire-adapted forests. This collaborative approach relies on local knowledge and expertise while benefitting from the combined strengths of a robust network of partners with the experience and ability to improve vegetation mapping, navigate CEQA, inform decision-making based on the best available data and science, conduct community outreach and education, and coordinate vegetation management projects throughout the region.

# C. LEGISLATION UPDATE

### **Bonds**

AB 305 (Villapudua D) California Flood Protection Bond Act of 2024.

Current Text: Amended: 4/25/2023 <a href="https://html.pdf">html</a> <a href="pdf">pdf</a>

Status: Awaiting hearing in Senate Natural Resources & Water and Senate Governance & Finance

Committee

Summary: Would enact the California Flood Protection Bond Act of 2024 which, if approved by the voters, would authorize the issuance of bonds in the amount of \$4,500,000,000 pursuant to the State General Obligation Bond Law for flood protection projects, as specified. The bill would provide for the submission of these provisions to the voters at the November 5, 2024, statewide general election.

AB 408 (Wilson D) Climate-resilient Farms, Sustainable Healthy Food Access, and Farmworker Protection Bond Act of 2024.

Current Text: Amended: 5/25/2023 html pdf

Status: Awaiting hearing in Senate Agriculture Committee and Senate Natural Resources & Water Committee

Summary: Would enact the Climate-resilient Farms, Sustainable Healthy Food Access, and Farmworker Protection Bond Act of 2024, which, if approved by the voters, would authorize the issuance of bonds in the amount of \$3,365,000,000 pursuant to the State General Obligation Bond Law, to finance programs related to, among other things, agricultural lands, food and fiber infrastructure, climate resilience, agricultural professionals, including farmers, ranchers, and farmworkers, workforce development and training, air quality, tribes, disadvantaged communities, nutrition, food aid, meat processing facilities, and fishing facilities.

AB 1567 (Garcia D) Safe Drinking Water, Wildfire Prevention, Drought Preparation, Flood Protection, Extreme Heat Mitigation, Clean Energy, and Workforce Development Bond Act of 2024.

Status: Awaiting hearing in Senate Natural Resources & Water and Senate Governance & Finance Committee

Summary: Would enact the Safe Drinking Water, Wildfire Prevention, Drought Preparation, Flood Protection, Extreme Heat Mitigation, Clean Energy, and Workforce Development Bond Act of 2024, which, if approved by the voters, would authorize the issuance of bonds in the amount of \$15,995,000,000 pursuant to the State General Obligation Bond Law to finance projects for safe drinking water, wildfire prevention, drought preparation, flood protection, extreme heat mitigation, clean energy, and workforce development programs.

SB 638 (Eggman D) Climate Resiliency and Flood Protection Bond Act of 2024.

Current Text: Amended: 6/28/2023 html pdf

Status: Scheduled for hearing on July 11, 2023 in Assembly Water, Parks, and Wildife Committee.

Summary: Would enact the Climate Resiliency and Flood Protection Bond Act of 2024 which, if approved by the voters, would authorize the issuance of bonds in the amount of \$6,000,000,000 pursuant to the State General Obligation Bond Law, for flood protection and climate resiliency projects.

SB 867 (Allen D) Drought, Flood, and Water Resilience, Wildfire and Forest Resilience, Coastal Resilience, Extreme Heat Mitigation, Biodiversity and Nature-Based Climate Solutions, Climate Smart Agriculture, Park Creation and Outdoor Access, and Clean Energy Bond Act of 2024.

Current Text: Amended: 6/22/2023 html pdf

Status: Scheduled for hearing on July 10, 2023 in Assembly Natural Resources Committee

Summary: Would enact the Drought, Flood, and Water Resilience, Wildfire and Forest Resilience, Coastal Resilience, Extreme Heat Mitigation, Biodiversity and Nature-Based Climate Solutions, Climate Smart Agriculture, Park Creation and Outdoor Access, and Clean Energy Bond Act of 2024, which, if approved by the voters, would authorize the issuance of bonds in the amount of \$15,500,000,000 pursuant to the State General Obligation Bond Law to finance projects for drought, flood, and water resilience, wildfire and forest resilience, coastal resilience, extreme heat mitigation, biodiversity and nature-based climate solutions, climate smart agriculture, park creation and outdoor access, and clean energy programs.

### Wildfire

AB 297 (Fong, Vince R) Wildfires: local assistance grant program: advance payments.

Current Text: Introduced: 1/26/2023 html pdf

Status: Passed the Senate Natural Resources & Water Committee and will be heard next in Senate Appropriations.

Summary: Current law requires the Department of Forestry and Fire Protection to establish a local assistance grant program for fire prevention and home hardening education activities. Under existing law, the Director of Forestry and Fire Protection may, until January 1, 2024, authorize advance payments from a grant program award, not to exceed 25% of the total grant award, except as specified. This bill would extend the director's authority to authorize advance payments from a grant program award to January 1, 2034.

AB 338 (Aguiar-Curry D) Public works: definition.

Current Text: Introduced: 1/30/2023 html pdf

**Status:** Awaiting hearing in Senate Labor Committee

Summary: Current law requires that, except as specified, not less than the general prevailing rate of per diem wages, determined by the Director of Industrial Relations, be paid to workers employed on public works projects. Existing law defines the term "public works" for purposes of requirements regarding the payment of prevailing wages to include construction, alteration, demolition, installation, or repair work done under contract and paid for using public funds, except as specified. Current law makes a willful violation of laws relating to the payment of prevailing wages on public works a misdemeanor. This bill would, commencing January 1, 2025, expand the definition of "public works" to include fuel reduction work done under contract and paid for in whole or in part out of public funds performed as part of a fire mitigation project, as specified. The bill would limit those provisions to work that falls within an

apprenticable occupation in the building and construction trades for which an apprenticeship program has been approved and to contracts in excess of \$100,000. The bill would delay the application of those provisions until January 1, 2026, for nonprofits.

AB 388 (Connolly D) Wildfire and Forest Resilience Action Plan: implementation strategies: roadmap.

Current Text: Amended: 5/18/2023 <a href="https://html.pdf">html</a> <a href="pdf">pdf</a>

Status: Passed the Senate Natural Resources & Water Committee and will be heard next in Senate Appropriations.

Summary: Current law establishes the Regional Forest and Fire Capacity Program to support regional leadership to build local and regional capacity and develop, prioritize, and implement strategies and projects that create fire adapted communities and landscapes by improving ecosystem health, community wildfire preparedness, and fire resilience. Under the program, the Department of Conservation is required to provide block grants to regional entities to develop regional strategies that develop governance structures, identify wildfire risks, foster collaboration, and prioritize and implement projects within the region to achieve the program's goals. Current law requires that regional priority strategy development be in coordination with public landowners and other relevant forest and fire planning efforts in wildfire and forest resiliency planning. This bill would, by January 1, 2025, require the Department of Conservation, in consultation with the Wildfire and Forest Resilience Task Force and its member agencies, to establish guidelines for funding the implementation of the regional priority strategies, as provided, and to establish regional investment strategies to identify and align resources that support implementation of regional priority strategies that contribute to the goals and key actions identified in the implementation strategy. The bill would authorize conservancies, departments, and boards within the Natural Resources Agency to directly award regional block grants to eligible regional entities, forest collaboratives, and partnerships to implement regional plans, strategies, agreements, and initiatives. The bill would require the Department of Forestry and Fire Protection to provide the task force and to post on its internet website a description, amount, and outcome of each regional block grant.

SB 470 (Alvarado-Gil D) Water: Urban Water Community Drought Relief program: Small Community Drought Relief program: high fire hazard and very high fire hazard severity zones.

Current Text: Amended: 4/27/2023 <a href="https://html.pdf">html</a> <a href="pdf">pdf</a>

Status: Scheduled for hearing on July 11, 2023 in Assembly Water, Parks, and Wildlife Committee.

Summary: Current law requires the State Fire Marshal to identify areas in the state as moderate, high, and very high fire hazard severity zones based on consistent statewide criteria and based on the severity of fire hazard that is expected to prevail in those areas. Current law requires a local agency to designate, by ordinance, moderate, high, and very high fire hazard severity zones in its jurisdiction within 120 days of receiving recommendations from the State Fire Marshal, as provided. Current law authorizes specified state agencies, including the Department of Water Resources, subject to an appropriation, to make grants and direct expenditures for interim or immediate relief in response to conditions arising from a drought scenario to address immediate impacts on human health and safety or on fish and wildlife resources or to provide water to persons or communities that lose or are threatened with the loss of water supplies. Existing law repeals this authorization on January 1, 2024. This bill would extend the authorization to January 1, 2026. The bill would, until January 1, 2026, establish in the department the Urban Water Community Drought Relief program and the Small Community Drought Relief program to provide grants for similar interim or immediate drought relief.

SB 504 (Dodd D) Wildfires: defensible space: grant programs: local governments.

Current Text: Amended: 4/20/2023 html pdf

**Status:** Awaiting hearing in Assembly Natural Resources Committee.

**Summary:** Current law requires the Director of Forestry and Fire Protection to establish a common reporting platform that allows defensible space and home hardening assessment data, collected by the qualified entities, to be reported to the department. Current law requires the department to establish a local assistance grant program for fire prevention and home hardening education activities and provides that local agencies, among others, are eligible for these grants. Current law requires the State Fire Marshal to identify areas of the state as moderate, high, and very high fire hazard severity zones based on specified criteria. Current law requires a local agency to designate, by ordinance, moderate, high, and very high fire hazard severity zones in its jurisdiction within 120 days of receiving recommendations from the State Fire Marshal, and authorizes a local agency, at its discretion, to include areas within the jurisdiction of the local agency, not identified as moderate, high, and very high fire hazard severity zones by the State Fire Marshal, as moderate, high, and very high fire hazard severity zones, respectively. This bill would require the department, when reviewing applications for the local assistance grant program, to give priority to any local governmental entity that is qualified to perform defensible space assessments in very high and high fire hazard severity zones who reports that information using the common reporting platform, as provided.

## Restoration

AB 345 (Wilson D) Habitat restoration: flood control: advance payments.

Current Text: Amended: 6/26/2023 html pdf

Status: Passed the Senate Natural Resources & Water Committee and will be heard next in Senate Appropriations.

Summary: Current law establishes the Central Valley Flood Protection Board and authorizes the board to engage in various flood control activities along the Sacramento River, the San Joaquin River, their tributaries, and related areas. This bill would authorize the Department of Water Resources or the board to provide advance payments, as defined, to local agencies for projects that restore habitat for threatened and endangered species under state or federal law or improve flood protection, as provided. The bill would prohibit the amount of funds advanced by the department or the board to the local agency at any one time from exceeding 25% of the entire amount authorized to be provided under the funding agreement. The bill would require the project proponent to demonstrate a need for an advance payment and that the project proponent is sufficiently qualified to manage the project and the project's finances. The bill would require the funds to be spent within 6 months and would require the recipient to provide an accountability report to the department or the board on a quarterly basis, as specified.

AB 809 (Bennett D) Salmonid populations: California Monitoring Program Fund.

Current Text: Amended: 6/29/2023 html pdf

Status: Scheduled for hearing on July 10, 2023 in Senate Natural Resources & Water Committee

Summary: Would require the Department of Fish and Wildlife to establish the California Monitoring Program to collect comprehensive data on anadromous salmonid populations, in coordination with relevant federal and state agencies, to inform salmon and steelhead recovery, conservation, and management activities. The bill would authorize the department to consult with local agencies, tribes, conservation organizations, and academic institutions to carry out monitoring efforts under the program. The bill would establish the California Monitoring Program Fund in the State Treasury to, upon appropriation by the Legislature, support the program. The bill would specify the types of moneys that may be deposited into the fund and would make related findings and declarations.

AB 1581 (Kalra D) Diversion or obstruction of rivers, streams, or lakes: lake or streambed alteration agreement.

Current Text: Amended: 4/7/2023 html pdf

Status: This bill was made a 2-year bill by the author and remains in the Senate Natural Resources & Water Committee

Summary: Would exempt certain individuals, public agencies, universities, zoological gardens, and scientific or educational institutions authorized to import, export, take, or possess any endangered species, threatened species, or candidate species for scientific, educational, or management purposes from the requirement to obtain an agreement with the department, as specified. The bill would instead require these entities to submit to the department a written notification, fee, and, if applicable, a copy of proposed environmental protection measures authorized by other agencies' programmatic habitat restoration permits, as specified. The bill would require the department to notify the entity in writing whether the exemption applies within 60 days from the date that the notification is complete and the fee has been paid. Because a violation of this provision would be a crime, the bill would impose a statemandated local program.

SB 361 (Dodd D) Water resources: stream gages.

Current Text: Amended: 3/29/2023 html pdf

Status: This bill failed to pass the Senate Appropriations Committee and is a 2-year bill

# **Summary:**

Current law requires the Department of Water Resources and the State Water Resources Control Board, in consultation with the Department of Fish and Wildlife, the Department of Conservation, the Central Valley Flood Protection Board, interested stakeholders, and, to the extent they wish to consult, local agencies, to develop the plan to address significant gaps in information necessary for water management and the conservation of freshwater species. This bill would require the Department of Water Resources and the board, upon appropriation of funds by the Legislature, to reactivate, upgrade, and install new stream gages, as provided. The bill would require the department and board to use the recommendations and data provided in the California Stream Gaging Prioritization Plan 2022 to complete specified actions by 2030. The bill would require the department to report to the Legislature, on or before January 1, 2026, and every 2 years thereafter, on progress made in completing those specified actions. The bill would require the data from all stream gages operating with any public money to be published as provisional data within 10 days of collection and made publicly available on the state's open water data platforms. The bill would require the department and board to develop and adopt a set of standards and processes for assessing, tracking, and reporting the accuracy of stream gages, evapotranspiration data, water meters, and other critical data inputs for water management, as provided. The bill would require the department and the board to consult with interested stakeholders

to develop a plan to identify the gaps in the network of automated weather stations and eddy covariance towers to ensure accurate and comprehensive data collection.

# **Public Meetings**

**AB 557** (Hart D) Open meetings: local agencies: teleconferences.

Current Text: Amended: 6/19/2023 html pdf

Status: Passed the Senate Governance & Finance Committee and is now on the Senate Floor

Summary: The Ralph M. Brown Act requires, with specified exceptions, that all meetings of a legislative body of a local agency, as those terms are defined, be open and public and that all persons be permitted to attend and participate. The act contains specified provisions regarding providing for the ability of the public to observe and provide comment. The act allows for meetings to occur via teleconferencing subject to certain requirements, particularly that the legislative body notice each teleconference location of each member that will be participating in the public meeting, that each teleconference location be accessible to the public, that members of the public be allowed to address the legislative body at each teleconference location, that the legislative body post an agenda at each teleconference location, and that at least a quorum of the legislative body participate from locations within the boundaries of the local agency's jurisdiction. The act provides an exemption to the jurisdictional requirement for health authorities, as defined. This bill would revise the authority of a legislative body to hold a teleconference meeting under those abbreviated teleconferencing procedures when a declared state of emergency is in effect. Specifically, the bill would extend indefinitely that authority in the circumstances under which the legislative body either (1) meets for the purpose of determining whether, as a result of the emergency, meeting in person would present imminent risks to the health or safety of attendees, or (2) has previously made that determination.

SB 537 (Becker D) Open meetings: multijurisdictional, cross-county agencies: teleconferences.

Current Text: Amended: 4/24/2023 html pdf

Status: Scheduled for hearing on July 12, 2023 in Assembly Local Government Committee Summary: Current law, under the Ralph M. Brown Act, requires that, during a teleconference, at least a quorum of the members of the legislative body participate from locations within the boundaries of the territory over which the local agency exercises jurisdiction. The act provides an exemption to the jurisdictional requirement for health authorities, as defined. Current law, until January 1, 2024, authorizes the legislative body of a local agency to use alternate teleconferencing provisions during a proclaimed state of emergency or in other situations related to public health that exempt a legislative body from the general requirements (emergency provisions) and impose different requirements for notice, agenda, and public participation, as prescribed. The emergency provisions specify that they do not require a legislative body to provide a physical location from which the public may attend or comment. Current law, until January 1, 2026, authorizes the legislative body of a local agency to use alternative teleconferencing in certain circumstances related to the particular member if at least a quorum of its members participate from a singular physical location that is open to the public and situated within the agency's jurisdiction and other requirements are met, including restrictions on remote participation by a member of the legislative body. These circumstances include if a member shows "just cause," including for a childcare or caregiving need of a relative that requires the member to participate remotely. This bill would expand the circumstances of "just cause" to apply to the situation in which an immunocompromised child, parent, grandparent, or other specified relative requires the member to participate remotely.

#### D. EXECUTIVE COMMITTEE, LEADERSHIP COUNCIL DIRECTION AND STAFF ACTION

# **NCRP Executive Committee Meeting**

The NCRP held an Executive Committee meeting on April 28, 2023.

# **NCRP Letters**

The NCRP was listed as a partner on the Water Bond Coalition letter of support for AB 1567 to Assemblymember Garcia, March 13, 2023.

The NCRP was listed as a partner to the Water Bond Coalition for letters of support for the Integrated Regional Water Management program sent to the Senate Natural Resources and Water Committee and Assembly Water, Parks, & Wildlife Committee on June 19, 2023.

Letters of support for partner applications to the CAL FIRE Forest Health Program, including Watershed Research Training Center, Coast Ridge Forest Council, Green Diamond Resource Company, Lake County RCD, March 2023.

Letters of support for the Russian River County Sanitation District's Wet Weather Treatment Plant Capacity Upgrades to Senators Feinstein and Padilla, May 13, 2023

The NCRP Executive Committee sent a letter of support for the Modoc Nation's collaborative juniper management initiative on July 7, 2023.

# **APPENDIX A**

# NORTH COAST RESOURCE PARTNERSHIP ACCOMPLISHMENTS

In the ongoing effort to track and report the actions and accomplishments of various NCRP initiatives and planning, following is a progress 'dashboard' that summarizes NCRP actions and projects from 2005.

### A. NCRP FUNDING AWARDS

- Project Implementation Agreements = 12
- Planning Grant Agreements = 10
- Total funding awarded = \$127,047,351
- Total reported funding leveraged = \$65,000,000 (actual leveraged and matching funds far greater than the reported amount)

#### **B. REGIONAL ADMINISTRATOR & PROJECT IMPLEMENTATION**

#### NCRP GRANT AWARDS SUMMARY LIST

							Time	eline	
Grant Name	Grant Award Amount	Grant Award Spent/ Invoiced	Funding Agency	Status	Sub Projects Awarded	Sub Projects Completed	Grant Agreement	Completion	Notes
			10.401.50.450.3		0.F0T.0D				

#### IMPLEMENTATION PROJECT GRANTS

#### PROPOSITION 50

The North Coast Integrated Regional Watershed Management Plan (NCIRWMP) was developed in response to the Proposition 50 (Prop 50) Round 1 Integrated Regional Water Management (IRWM) funding, awarded by the State Water Resources Control Board. The twenty-two projects funded through Proposition 50 Round 1 IRWM, were designed in this image, addressing ecological impacts at their source and generating benefits that have materialized in the regional and statewide economy. These projects directly addressed important goals of the NCIRWMP and the State of California: enhancing native salmonid habitat, providing adequate water supply to disadvantaged communities; and protecting and enhancing beneficial uses of impaired bodies of water. Prop 50 Round 2 & Supplemental Grant, funded by the State Water Resources Control Board, ensured that locally derived, solution -oriented actions are coordinated at the basin level and at the North Coast Region level to collectively address the cumulative impacts to salmonids and the beneficial uses of water throughout the entire North Coast Region.

Prop 50 Round 1	24,831,579	\$24.826.622	State Water Resources Control Board (SWRCB)	Completed	22	22	December 2007	April 2014	All 22 projects completed.
FTOP 30 Round 1	24,031,373	724,020,022	(SVINCE)	Completed	22	22	2007	April 2014	completed.
Prop 50 Round 2	\$2,075,000	\$2,074,740	SWRCB	Completed	4	4	April 2010	December 2015	All 4 projects completed.
Prop 50 Round 2 Supplemental	2,176,860	\$2,151,170	SWRCB	Completed	4	4	September 2010	December 2015	All 4 projects completed.

# PROPOSITION 84

The Prop 84 projects, funded by the Department of Water Resources (DWR), provided significant water supply and water quality benefits to disadvantaged communities (DACs) in the North Coast region. The projects addressed critical needs for water supply reliability through infrastructure improvements, while others focused on meeting water quality needs through extensive watershed restoration and rehabilitation efforts. Projects were selected to provide water supply reliability, water recycling, water conservation, water quality improvement, storm water capture and management, flood management, recreation and access, wetlands enhancement and creation, and habitat improvement while fostering coordination, collaboration, and communication among North Coast partners. The grant funding provided economic benefits as well, creating jobs and stimulating local economies. Many of the projects also provided cultural value, benefiting local communities and Tribes and furthering the goals of the NCIRWM/North Coast Resource Partnership.

#### **URBAN & MULTIBENEFIT DROUGHT RELIEF**

The Urban and Multibenefit Drought Relief Grant program, administered by DWR, will provide financial assistance to North Coast projects to address drought impacts on human health and safety, protect fish and wildlife resources, and support other public benefits, such as ecosystem improvements.

Urban/Multi- benefit Drought Relief:				ln					Currently active and working on
Implementation	\$7,907,271	\$2,472,338	DWR	progress	15	0	March 2022	April 2026	implementation
Urban/Multi- benefit Drought				In					Currently active
Relief: Planning	\$685,485	\$342,743	DWR	progress	2	0	June 2022	Aug 2025	and working on implementation

#### REGIONAL FOREST HEALTH PILOT

CAL FIRE awarded the NCRP a \$10 million grant to implement the Regional Forest Health Pilot. This program was developed in collaboration with the California Wildfire and Forest Resilience Task Force (Task Force) and designed to be one of the implementing engines, furthering the goals of the California Department of Conservation's (DOC) Regional Forest and Fire Capacity (RFFC) Program. The NCRP Regional Forest Health Pilot will be a test bed intended to result in a regional, landscape scale portfolio of projects that implement the goals of the CAL FIRE Forest Health Program. It will be used to evaluate opportunities to connect CAL FIRE's Forest Health program with the priorities outlined in the NCRP's Regional Priority Plan funded by DOC's RFFC Program.

#### **PLANNING GRANTS**

#### STRATEGIC GROWTH COUNCIL, SUSTAINABLE COMMUNITIES PLANNING GRANT

The objectives of the Strategic Growth Council, Sustainable Communities Planning Grant supported the NCRP to develop and obtain data related to carbon sequestration, emissions and renewable energy, forest and watershed health, downscaled climate data, natural capital values, sea level rise, built infrastructure – including water and wastewater, communications, transportation, and energy transmission. These data then became the basis for myriad meetings and planning sessions focused on integrated planning - among elected Tribal and County leaders, technical experts, staff and the community. The intent of these meetings and the planning process was to evaluate the data and information collected and to consider mechanisms to achieve multiple benefits from a particular strategy, action or set of actions. Examples included collaborative planning focused on geographic areas or projects that could achieve objectives related to fuel load reduction, forest health, water supply and quality, emissions reduction, local jobs and revenue and climate adaptation. These funds supported the development of the following: Climate Mitigation Report for the North Coast Region of California; North Coast Regional Climate Adaptation Report; Healthy Watersheds, Vital Communities, Thriving Economies: Actionable Strategies for California's North Coast Region; North Coast Healthy Watersheds & Vital Communities: Economic Analysis; Technical Report for the North Coast of California Ecosystem Service Valuation, March 2016; and A Review And Assessment of Potential Funding Sources for the North Coast Resource Partnership.

Grant	\$1,000,000	\$986,044	Conservation	Completed	N/A	N/A	June 2014	March 2018	planning project.

#### PROPOSITION 84 PLANNING GRANT

The Proposition 84 Planning Grant was awarded by DWR to the NCRP to facilitate activities associated with the implementation and maintenance of, what was referred to at that time as, the North Coast Integrated Regional Water Management Plan (NCIRWMP). The project integrated long term planning and high-quality project implementation in an adaptive management framework—fostering coordination and communication among the diverse stakeholders in the Region. Focus areas for the NCIRWMP included salmonid recovery, enhancement of the beneficial uses of water, and the synchronization of state and federal priorities with local priorities, knowledge, and leadership.

TRIBAL ENGAGEMENT & ECONOMIC OPPORTUNITY FOR DISADVANTAGED COMMUNITIES FOR WATER AND WASTEWATER SERVICE PROVIDERS

The NCRP undertook this pilot project to address the problem of failing infrastructure in economically disadvantaged communities (DACs) and provide tools to help sustain safe and effective water and wastewater service into the future. The funding provided for this project supported the NCRP's ability to gain a better understanding of the challenges faced by DACs in the North Coast Region. Technical assistance has been provided to disadvantaged communities and Tribes to help identify needs and potential solutions and prepare for funding opportunities. The project has been very successful in increasing the understanding of the needs of DAC water and wastewater service providers in the Region, improving lines of communication, and developing tools and

strategies to build capacity.

# REGIONAL FOREST AND FIRE CAPACITY (RFFC) PROGRAM BLOCK GRANTS

The grants are designed to align with and reflect all elements of the RFFC program guidelines, and will support the rapid increase of wildfire, forest, and community resiliency projects consistent with the California Wildfire and Forest Resilience Action Plan, Agreement for Shared Stewardship of California's Forests and Rangelands, the California Forest Carbon Plan, and Executive Order B-52-18. This will be accomplished through the development and implementation of NCRP's Regional Priority Plan, supporting the enhanced capacity of regional partners, and developing a substantial suite of priority projects ready for implementation. Nearly \$1.8 million of this award was used to fund 13 demonstration projects intended to be scalable, replicable, measurable, innovative, and result in outcomes that will increase the pace, scope, and scale of multi-benefit forest management and stewardship in the North Coast

#### FIRE RESPONSE CAPACITY PROJECT

The grant funded by the Humboldt Area Foundation and Wild Rivers Community Foundation funds a pilot project intended to strengthen the long-term sustainability of the fire response programs of Tribes and very rural fire departments and protection districts, through capacity building. The geographic area covered by this pilot project encompasses Humboldt (including Karuk Tribal territory that overlaps with Siskiyou County), Del Norte, and Trinity Counties. This pilot project is being integrated into the larger regionwide RFFC Program.

#### ACTIONABLE LIDAR-BASED DATA FOR WILDFIRE PREVENTION PLANNING, RESPONSE, AND REHABILITATION ON CALIFORNIA'S NORTH COAST

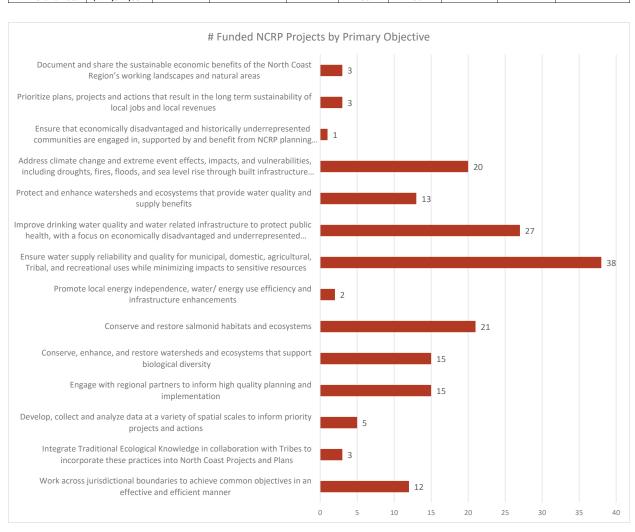

The NCRP worked with regional and state partners to secure funding for the "Filling the gaps in lidar data for Northern California" project which is supporting the acquisition and processing of lidar data by the U.S. Geological Survey (USGS). Subsequently, the NCRP was selected to receive funds (\$149,466) from the National Aeronautics and Space Administration (NASA) to support the "Actionable Lidar-Based Data for Wildfire Prevention Planning, Response, and Rehabilitation on California's North Coast Project". The Project will process the lidar data collected by the USGS to create a unified point cloud and derived products to support wildfire planning, response, and recovery for the twelve (12) million acres of California's North Coast Region.
